Government Statistician.

MEMORANDA.

Population.—The last quarterly estimate of population shows an increase of 13,564, which was higher than in September quarter for many years past, the natural increase being the highest on record. During the nine months ended 30th September, the total increase was 32,764, or at the rate of 2·6 per cent. per annum. Of the increase, 22,286 was due to excess of births over deaths, and 10,478 to excess of arrivals.

Trade.—The oversea imports during November were valued at £2,083,077, which shows an increase of £231,180, or over 12 per cent., as compared with the corresponding month of last year. The total for the eleven months was £21,156,278, an increase of £2,647,458, or over 14 per cent. over the corresponding figures for 1909. There were increases in most of the principal articles—apparel and soft goods, agricultural implements, boots and shoes, iron and steel, metal manufactures, tobacco, cigars, &c.

The oversea exports for November amounted to £3,876,765, being an increase of £576,415, or over 17 per cent., compared with the corresponding month of last year. For the eleven months there was an increase in the oversea exports of £5,631,857, or over 25 per cent., as compared with last year.

Principal increases during the eleven months were— £

Wool	2,148,300
Wheat	1,628,620
Butter...	380,251
Meats	660,149
Minerals	551,344
Skins	346,582

Separating merchandise from gold, the exports of the former during the eleven months increased by £6,226,107, and the latter decreased by £594,250.

Imports at Sydney.—Excluding the value of the imports from State ports, the articles imported at the port of Sydney in November were valued at £2,893,040. The following is a summary of the imports during the month :—

	Weight.	Measurement.	Value.		
				tons.	tons.
Imports Oversea	44,597	47,615	2,000,997

To State Ports	...	5,442	1,500	"	

A few special articles, notably timber and wool, are not included above, as the weight or measurement was not ascertained, but the quantities thereof are shown in the detailed table within.

Public Finances.—The Public Accounts for November show that the net revenue for the month was £1,278,816, or £23,442 less than in November of last year. During the five months ended 30th November the revenue was £5,781,560, being £126,401, or over 2 per cent., more than the corresponding period of the last financial year.

Principal increases during the five months were— £

From Railways and Tramways	...	359,504
,, Taxation	...	114,302
,, Public Lands	...	109,489
,, Sydney Harbour Trust	...	14,540

Principal decrease during the same period was— £

Commonwealth Revenue	...	463,424
----------------------	-----	---------

The expenditure during November was £828,051, an increase of £88,224, as compared with November of last year. During the five months the expenditure was £5,976,572, being £344,772, or over 6 per cent., more than in 1909–10.

Principal increases during the five months were— £

Business Undertakings	167,294
Government Departments	74,994
Interest Repayments	102,484

On the 30th November, 1910, the Consolidated Revenue Account was in credit to the amount of £36,285.

Mineral Production.—The value of the minerals exported from New South Wales during the third quarter of 1910 amounted to £1,707,223, and during the first nine months to £4,200,989, which show increases of £150,237 and £353,709 respectively, as compared with the corresponding periods of last year. The output of the silver lead mines is responsible for an increase in value during the nine months of £199,536; the exports of copper and tin also show favourable increases for the period, the former in both quantity and value, the latter in value due to the enhanced price of the metal. In the coal trade a falling off is exhibited in the oversea shipments of 240,536 tons, and £125,933 in value.

The gold yield during November was 22,370 oz. crude, equal to 19,527 oz. fine, valued at £82,947. During the eleven months of 1910 there has been a decrease in the value of gold produced of £18,560, as compared with the corresponding period of last year.

Prices.—The general index number for November was lower than in October, and also slightly lower than for the corresponding month of last year. The index number for pastoral produce was 1,224, for metals 1,152, and for all articles 1,212. During the month there was, except in respect of metals, a decline in the prices of a number of the principal articles—wheat, flour, greasy wool, and hides. Tallow and leather advanced in price.

Meteorology.—During the month of November, the rainfall recorded in the western half of the State, and in large portions of the North-eastern and South-eastern Divisions, was above the average, the result of a series of monsoonal disturbances, accompanied by thunderstorms. In several parts of the State the falls were extremely heavy. On the Highlands and Coastal Districts generally the totals were below normal. The temperature experienced during the month, although exceptionally diversified, was, on the whole, mild.

Land Selections.—During November, 109 new settlers applied for 56,003 acres; and 152,769 acres, representing 198 blocks, were set apart for residential settlement. Since the beginning of the year the number of new settlers has been 1,731, and the area applied for 985,915 acres. The original area set apart for residential settlement since the 1st January has been 843,940 acres, representing 1,191 blocks.

The probable results of the wheat harvest for the present season in the principal divisions of the State may be seen from the above table. The particulars are based on information supplied by farmers.

The reports indicate that the area sown with wheat was 2,529,200 acres, of which 436,932 acres will be cut for hay, and 2,012,058 acres reserved for grain (as compared with 1,990,180 acres in 1909-10). The average yield is 11·7 bushels per acre, as compared with 14·3 bushels last season, and 10·1 bushels, the average of the preceding ten years.

The area this season which has been fed-off, or which failed entirely, exceeds 80,000 acres, of which 71,000 acres are in the Central Tableland, North, and Central-Western Slopes, and Central-Western Plains, where the influence of the dry season and of the late frosts was felt most keenly.

One of the features of the present harvest is the patchiness of the crops, even in the South-Western Slopes and Riverina divisions, where more than half of the wheat is grown. There are many excellent crops, but there are also large numbers of light crops, and their patchy nature in various districts has made it difficult to determine accurately the production of grain. The range in the average yields extends from 2 or 3 bushels to 30 bushels per acre.

The present season experienced an abundant rainfall in January and February, but was followed by three dry months, while the all-important months of September and October had a rainfall much below the average.
